## PRINTED WEBSITE REPORT

- **Wichita State University's National Institute for Research and Digital Transformation** focuses on developing new and innovative digital technologies including research and innovation in cloud computing and software development utilizing high-speed broadband in Kansas, cybersecurity and cyber operations and in-demand system engineering technology. The program specifically develops a cyber range that allows for collaboration and testing of cybersecurity components for private industry to Department of Defense clients.
- The importance of an expanding technology and cybersecurity workforce is underscored by the Greater Wichita region's concentration of aviation and manufacturing firms that contract with the Department of Defense (DoD). Our ten-county region is home to over 450 aviation companies and 900 manufacturing firms. As the DoD continues to implement rigorous cybersecurity requirements, these companies look to the Greater Wichita region's homegrown cybersecurity experts to stay compliant and competitive.
- **Butler County Community College's IT Academy** partners with high schools to graduate students with associate degrees in a variety of tech fields and offers a cybersecurity pathway program with Friends University as well as Wichita State University.
- The **INTRUST Bank Cyber Security Laboratory at Friends University** is one of only three of its kind in the nation in a university setting. The cyber lab offers cybersecurity students enrolled in the bachelor's program an opportunity to learn and practice real-time attack and defense mechanisms. The lab utilizes the most comprehensive cyber defense training platform available.
